Types of Entrepreneurship

1. Techno- entrepreneurship
2. Women entrepreneurship
3. Social entrepreneurship
4. Intrapreneurship
5. Rural entrepreneurship
6. Family entrepreneurship

Techno-entrepreneurship

- In today's technology-driven world, a **technopreneur usually starts a business with just an idea.** First, they look at how things are done right now and think about the problems in those methods. **Then they come up with better ideas to do things differently using technology.**
- **A technopreneur uses technology to create a product or solution that makes work easier, faster, or smarter.** Instead of following old or traditional ways, they improve them by using modern tools and innovation. **Their goal is not just to change the present way of doing things, but also to shape how those things will be done in the future**.

- We all know **Facebook, twitter and google some of the great examples** of tech entrepreneurship.
- **Companies like these have created new industries** all on their own, **creating billions of dollars of value, boosting economies in the countries** from which they grow.
- **Through it investment and jobs comes.**
- **Through investment and jobs comes greater competitive advantage** on an international scale, **which in turn attracts more even investment** which can be **used to further develop the nation**.
- **Countries like Israel**, for example, have enjoyed great economic growth ,thanks to their tech talents.(What's app, global player in cyber security- check point company)

Impact of tech entrepreneur

- The Impact so in addition to **social media**, thanks to tech entrepreneurs, we can now enjoy things like:-
- **Access to global markets and talent** through things like **Alibaba.**
- Work from wherever we are through things like **smart phones and tablets**.
- The ability to **connect around the globe** with ease through things like **Skype and Google Meet**.

What is Tech Entrepreneurship?

- It's just like **'normal' entrepreneurship with a particular focus on opportunities that require**, or become amplified by, **technology.**
- So this means that tech entrepreneurs spot and identify opportunities in much the same way as others, and essentially go about developing solutions in much the same way too. **The big difference is that they utilise and rely on their unique 'tech' skill sets to create their competitive advantage.**

Elements of Successful Tech -Entrepreneurship

Need to create Unique Value

These days, **many people strive to solve the same problem or offer the same value(product)**.

As a result, particularly **in the tech field, creating truly unique value is of critical importance**.

As soon as a customer sees something they've seen before, it's probably not long your customer anymore!

Stay up-to-date

Technology changes very fast. What is useful today may become outdated tomorrow.

Entrepreneurs should keep learning about new technologies and changing customer needs

Doing something unique but outdated has no value in tech business.

Get the right people

Tech ventures **need people who not only technical smarts but also a one who is creative ,keep learning and commit to grow companies.** This is a **hard balance to find (skills + long term commitment).**

Size of the target market

Tech businesses are expensive to run (good staff, technology, innovation).

Once a tech product is made, **selling it to more people brings much higher profit with almost the same cost.**

So they must sell to a large number of customers, this could be thousands or even millions of people

Serving 1,000 customers or 1 million customers does not cost very differently in tech businesses

Company Logo	Company Name	Company Management	Company Description
	Kwebmaker	Dhananjay Arora , Founder & CEO	Started Kwebmaker in 1998 as a web-agency, the firm has built brands on the web and is amongst the top Digital Agencies in Mumbai while working closely with great companies and brands.

- *“Somebody once said, educate a woman & u will educate a family.” But the new saying is empower a woman to become an entrepreneur, & you will create an entire family of entrepreneurs. Women entrepreneurship is the need of the nation right now, it is the surest quickest way to make INDIA a super power”*

Challenges faced by women entrepreneurs

1. Microsphere- Mainly confined to the local environment and obliged to live close to the family.
2. Mesosphere- Work at a regional or national level.

   Acts as a barrier when providing assistance to them within this environment.

3. Macrosphere- working at global level

Why women becomes entrepreneur

- To become economically independent
- To establish their own enterprise
- To establish their identity in society
- To achieve Excellence
- To build confidence to themselves
- To develop risk assuming ability
- To claim equal status in society
- To secure greater freedom & mobility Liking for business
- An urge to do something new

Strategies for the development of women entrepreneurs

- Encouraging home-based business
- Widespread business education(Workshops, conferences, training…)
- Better financial assistance(venezuelas women development bank)
- Wider access to technology(With the help of internet)

Problems faced by women entrepreneur

- Male dominated society
- Lack of business information
- Low risk taking ability
- Lack of education
- Lack of family support

Government incentives

- Mahila Vikas Nidhi
- District industries center
- Rashtriya Mahila Kosh

Mahila vikas nidhi

- Under Mahila Vikas Nidhi, a **cumulative help of Rs. 80.4 million was sanctioned, during the period 1990-2001** . Various training- cum production centres set up by NGOs mostly **relate to activities like spinning, weaving, block printing, handloom products, handicrafts** etc.
- Mahila Udyam Nidhi (MUN) is a **SIDBI-operated scheme providing soft loans up to ₹10 lakh without collateral** to women entrepreneurs **for setting up or upgrading small-scale industries**. It features **low-interest rates**, and **a 6-8 year repayment period**, **aiming to foster financial independence and self-employment**.

District industries center(DICs)

- DICs arrange various lectures and seminars etc. In girls colleges and technical institutes to encourage them to set up their own enterprises.

- They facilitate business setup, licensing, finance, and training for entrepreneurs. Established in 1978, they act as a vital link between government policies and local industrial development.

Rashtriya Mahila Kosh

- It was set up in 1993 to **provide micro- credit to poor and rural women who had no access to financial institution** at with **very low transaction costs, rates of interest and simple procedures**. It proved quite useful for lower income group women.
- It **provides loans through Intermediate** Micro-financing Organizations (IMOs) like **Self Help Groups (SHGs), NGOs**, etc. instead of giving loans directly to women.

Institution supporting Women Entrepreneurs in India

- **Consortium of women entrepreneurs of India(CWEI):** It works as a common platform to help women-led businesses enter both national and international markets.

- **Federation of Indian women entrepreneurs(FIWE):** Founded in 1993, FIWE is a national organization dedicated to developing entrepreneurship skills for women across India.

- **FICCI Ladies organization(FLO):** Established in 1983, FLO is the women's wing of the Federation of Indian Chambers of Commerce and Industry (FICCI).It aims to promote entrepreneurship and professional excellence through workshops and seminars.

- **Women's India trust(WIT):** Founded in 1968 by Kamila Tyabji, WIT is a charitable organization that helps "underprivileged" and unskilled women.

- **Association of women entrepreneurs of Karnataka(AWAKE): "Entrepreneur Guiding Entrepreneur"-** This is their unique model where successful women business owners volunteer to mentor and counsel newcomers

Social entrepreneurship

Social entrepreneurship is **the process by which individuals, startups and entrepreneurs develop and fund solutions that directly address social issues**. A social entrepreneur, therefore, is **a person who explores business opportunities that have a positive impact on their community**, **in society or the world.**

- **Social entrepreneurship is the process of recognizing and resourcefully pursuing opportunities to create social value**. Social entrepreneurs are innovative , resourceful, and results oriented. **They draw upon the best thinking in both the business and non-profit worlds to develop strategies that maximize their social impact.**

- **These leaders operate in all kinds of organizations : large and small; new and old; religious and secular; non-profit, for-profit, and hybrid. These organizations comprise the 'social sector'.**

- For-profit entrepreneurs typically measure performance using business metrics like profit, revenues and increases in stock price. **Social entrepreneurs, however, are either non-profits, or they blend for-profit goals with generating a positive "return to society“**
- Typically **attempts broad social, cultural and environmental goals** often associated with the voluntary sector in areas **such as over coming poverty , health care and community development**.

Social entrepreneurship Drivers

- Social issues inadequately addressed by government.
- Need to raise funds for charities.
- Changes in public sector.

1. Budget cuts require new revenue streams
2. Change rather than good stewardship (innovating rather than just maintaining old ways).

? Growing demand for corporate social responsibility and ethical entrepreneurship

- Social Entrepreneurship holds the key for future development in India. In the days to come, social entrepreneurs will play a crucial role in the advancement of social changes. **The best thing about social entrepreneurship is that success is not mentioned by financial gains, but by the number of people these enterprises are able to reach and create a positive impact.**
- **In the coming days, social entrepreneurship and Social businesses will be in the mainstream**, which will hopefully impact the society positively.

Intrapreneurship

- **Intrapreneurship is Becoming an Entrepreneur on the Job**.
- Intrapreneur- **A person within a large corporation who takes direct responsibility for turning an idea into a profitable finished product, process or service through assertive risk taking and innovation.**
- **Intrapreneur have entrepreneurial skills blended with managerial skills but operate within an organization.**

- An intrapreneur is an employee who is tasked with developing an innovative idea or project within a company. **The intrapreneur may not face the outsized risks or reap the outsized rewards of an entrepreneur. however, the intrapreneur has access to the resources and capabilities of an established company.**
- Intrapreneurs are “dreamers who do”, those who take hands-on responsibility for creating innovation of any kind within an organization.
- **Intrapreneur is an essential ingredient in every innovation.**

3 Types of Intrapreneur

1. **<u>The Advocate</u>**

- An Advocate is an **employee inside a company who speaks for the customers.**
- The Advocate typically comes from a customer-facing role. **They play a leading role in shaping the problem to be solved**, **defining the attributes of the customer and what the solution itself should look like**. They are often easiest to spot in a company as they constantly come up with a stream of new ideas**.**
- **They often have roles like designer, business analyst, user experience or perhaps come from a sales or marketing background.**

2. The Creator

- The Creator is **an internal facing role**. The Creator is the person that **will give life to your idea and create the prototype solution**.

- In the **tech-centric world** we live in, this person is **often a programmer or engineer**, but depending on your industry, they could have a very different job title. For example, if you work **in the food industry** then the **Creator might be a chef or nutritionist**.

- Advocate says: “Customers want a faster app.”
- Creator builds the app feature that makes it faster.

3. The Change Maker

- The Change Maker is **external business-facing person**. This is the person that **makes things happen… funding, partnerships, finance, sales**. This **person is usually an extrovert, self-confident and a great networker**. The team will rely on The Change Maker to open doors for them, win-over the gatekeepers in the company and get the necessary buy-in from stakeholders.

- Advocate finds a customer problem
- Creator builds the solution
- Change Maker gets approval, money, and support to launch it

Why should organizations embrace intrapreneurs?

- Innovation-To create and bring into use profitable new products, processes, services, and ways of doing business.

1. Creation of new or alternative products
2. Opening of a new market
3. Capture of new sources of supply

Intraprenurial activity

- Spotting ways to improve service
- Save time, money, or make life easier
- Visualizing variations of current products / services
- Realizing new communication avenues with customers
- Enhancing the quality
- New ways to get the job done quicker or smarter

How does Business benefit?

- Firms **create competitive advantages** by discovering new and better ways to compete in an industry and bringing them to market.
- **An enterprise that does not daily innovate will declines.**
- Even in a successful business the **disease of bureaucracy and complacency is dangerous.**

How do Intrapreneurs benefit?

- Flexibility
- Less restrictions and supportive environment
- Recognition
- Their ideas are vehicles towards advancement
- Increased value to organization - increased PAYCHECK

Family business

- Family firm is a corporation that is entirely owned by members of single family. It is also **known as company owned, controlled and operated by members of one or several families.**
- **Family business is one in which one or more members of one or more families have ownership, interest and significant commitment towards business.**

Stages of development of a family business

1. Entrepreneurial (after identifying business opportunity)

- This is the **starting stage** of the business. **A family member finds a good business idea and starts the business**.
- The **owner takes most of the decisions**. Work is informal, and there are **no proper systems** yet.
- **Main focus is on survival and starting the business successfully.**
- **Eg- Dhirubhai Ambani started Reliance in the 1960s as a small textile trading business.**

2. Functionally specialized (growth phase)

- The **business starts growing**. **Different departments are created** like marketing, finance, production, HR, etc.
- **Expansion and increasing sales is the goal.**
- Eg- **As Reliance expanded into petrochemicals and refining**. Separate departments were formed and Professional managers were hired.

3. Process-driven (system oriented)

- The business becomes **more organized and proper rules, systems, and procedures are made**.
- Decisions are not only taken by one person but whole management structure is formed. **Work is done according to fixed processes.**
- **Main focus is on efficiency and smooth operations**.
- Eg- When **Reliance became a large corporate clear policies and systems were introduced,** Corporate governance is improved. **Now business runs smoothly even without the founder's direct involvement.**

4. Market-driven(matures)

- **The business becomes fully developed** and stable and It **focuses strongly on customer needs and market competition**.
- **Strategic planning and professional management are used** and the business may **expand nationally or internationally**.
- **Main focus is on sustainability and long-term success.**

Characteristics

1. Importance of family relationship
2. Composition of the board of director
3. Loyalty
4. Dedication of family members
5. Male-dominated
6. Dominance of certain trading communities

Various types of family businesses

1. Family owned business-

- This is a business that is owned by members of one family. The main **goal is to earn profit**.
- **Family members may not manage it daily, but they own it.**

2. A family owned and managed business-

- The business is not only **owned by the family but also run by them.**
- **At least one family member is actively involved in managing daily work.**

3. A family owned and led business-

- Here, the family **owns the company and also makes important decisions may they are not involved in operational or day to day activity's decision making.**
- A **family member is part of the Board of Directors** (top decision-making group).

Family business model- Based on family and business orientation.

- Model is based on **how much importance is given to business performance (profit, growth, professionalism)** and **how much importance is given to family relationships and control.**
- **Captain**- low business and low family orientation
- **Family team-** low business and relatively high family orientation
- **Professional family-** low family orientation and high business orientation
- **Family enterprise model-** high family orientation and high business orientation

Challenges faced by family-owned business

- Non-participating family member
- Family emotions
- Family versus business
- Defining authority
- Fair to all approach(equal salary or profit and giving opportunities will be difficult led to conflict)
- Retaining non-family professionals
- Change management
- Decision making
- Succession planning

Rural entrepreneurship

- Rural Entrepreneurship is that entrepreneurship which **ensures value addition to rural resources in rural areas engaging largely rural human resources.**
- **Rural entrepreneurship refers to the development of a new enterprise which pioneers new products and services, creates a new market for its offerings or uses advanced technology in the rural area.**

Why rural entrepreneurship?

- As **people are migrating from rural areas to urban areas due to lack of job opportunities** and rural youth is unable to find any options for their growth. **It is not only bad for the rural areas but it also put pressure on the infrastructure and amenities of the urban areas.**
- However, a **large number of products and services are available in remote areas but people do not have any inventive ideas to utilize all these resources in a proper manner**. That is the reason why **rural Entrepreneurship is highly required to develop the small villages and their people too.**

Need for rural entrepreneurship

- Employment generation
- Income generation
- Not only protect but also promotes the art, culture and creativity, i.e. the varied heritage of that particular region.
- Reduces migration of villagers
- Proper Utilization of resources
- Plug the gap

Problems of rural entrepreneurship

- Lack of technical know-how
- Lack of training services
- Management problems
- Lack of quality control
- Lack of infrastructure
- Poor quality of raw materials
- Lack of latest technology
- Lack of promotional strategy
